

# Real World Asset Tracking

Take control of your assets, your information and your profitability.

- Deliver and return assets by scanning bar codes
- Document oxygen fills and lot numbers
- Obtain electronic signatures
- Perform quick inventory audit

In a market where product differentiation is almost non-existent, prices are largely fixed or steadily decreasing, asset data is unreliable, and there are ever-increasing regulations, TrackAbout® is leading the way in helping companies effectively manage their assets and their bottom line.

## Asset Tracking

**Easy to Learn and Use**  
Sophisticated, easy to learn handhelds—train drivers in 30 minutes or less

**Complete View of Asset History**  
Quickly view cradle to grave histories of your assets

**Manage Asset Inventory on the Move**  
Track inventory anywhere—patients homes, on the truck and in the branch

**Know your Patient's Inventory**  
Stay one step ahead—know what to retrieve from patient's home when service ends

## Operations Reporting

**Reduce Logistics Costs**  
Find patients receiving deliveries too frequently

**Purchase Fewer Assets**  
Get non-turning cylinders returned before you buy new ones

**Track Lot Numbers**  
Track lot number from vendors or internal filling to patients

## Maintenance Tracking

**Track Maintenance Records**  
Access information from browser or handheld

**Create Custom Electronic Forms**  
Utilize custom electronic forms for maintenance or any other needs

**Retrieve Maintenance Records Online**  
No more time consuming management of paper records

**Preventative Maintenance Alerts**  
Receive alerts when maintenance is nearing due date

**TrackAbout—proven and leading the way.**
